TEAM ID: PNT2022MID25606
PROJECT NAME: REAL TIME COMMUICATION SYSTEM POWERED BY AI FOR SPECIALLY ABLED

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

⏱ 2 minutes

AISHWARYA R

- In emergency times conveying their messages is very difficult
- since normal people are not trained on hand sign language
- AI tecnology can apply to any type of disability profile
- It is very difficult for mute people to convey their message to normal people

JAYANTHINI S

- Communication should be universal without any barriers or limitations
- Communication is an important right, sometimes people with disabilities have the need for supports due to complex communication
- Supported to develop an effective, efficient and reliable means of indepentant communication
- Speak directly to the person rather than the person with them

KANIMOZHI V

- Only refer to the person's disability if necessary or relevant
- Avoid saying anything that implies the person with disability is superhuman, courageous or special
- Research institutions and medical facilities are using the ability to analyse massive data sets to sequence the human genome

DHARANI M

- Communication should be universal without any barriers or limitations
- developing an app will support this vulnerable society of impaired people and enhance communication among people
- our objective is to blend deaf and dumb within society and make them able to use their personal computers more effectively and efficiently
- recommended our saline somewhat interpretation know it is much easier worth removing for complexity of experience

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. Once all sticky notes have been grouped, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

⏱ 20 minutes

Unnamed

What went well	What didn't go well	Actions
useful to disabled people	cost is less	improve team management
use ofthe automated devices	smort solutons to solve problem	speak directly to the person rather them
website for disabled people	making many revolutionary changes in the life of disabled peoples	
improve the knowledge for disabled people	easy to communicate	

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⏱ 20 minutes

- Cost of this application is less
- smart solutions to solve the problem
- easy to communicate
- it is very difficult for mute people to convey their message to normal people
- improve the knowledge of disabled peoples
- devices the new form of treatment and improve patient care
- Website for disabled peoples
- Deep learning is used to solve the problem for disabled peoples
- speak directly to the person rather them
- use of the automated devices
